CAREER SUMMARY

A self-motivated Full Stack Web Developer with knowledge and proficiency in front-end and back-end technologies, as well as strong skills in writing clean and efficient code. Enthusiastic about using the honed technical ability as a Web Developer to take a company to the next level.

Technical Skills:
MERN Stack: Node.js, Express.js, React.js, MySQL, Sequelize, MongoDB, Handlebars JS etc.
Browser Based Technologies: JavaScript, jQuery, CSS3, Bootstrap, HTML5, Firebase, etc.

APPLICATIONS BUILT

PAXI Express
- PAXI is a new mode package delivery app. Anytime, Anywhere, and Any price are three main differences from the traditional express business such as UPS or DHL
  1. Faster. Normally, the shipping company do one to two shippment per day, and the shipping process will last for 2 to 7 busniess days. PAXI ships at anytime you prefer.
  2. Location. We don't have a store location. Customers ship their packages at anywhere they like. It feels like call a taxi to deliver your package.
  3. Price. All the popular express companies operating the business with B2C mode. However, PAXI use C2C business mode which means we give users less limit but more authority to customize their packages, the user can even price their shipping fee up to how faster their desire to ship.
- Main Technologies: React, Node Express, MongoDB, Mongoose, Google Map API, Passport.js.
- Github: https://github.com/squall2046/PAXI

Web Scraper
An app that allows users to scrape news, images, and many useful information from any websites with No API Needed, the demo was scraping data from IGN.com for an example.
- All scraped data will be saved to app database, and app support to clear database and scrape new.
- Users are also allowed to save their favorite news and leave notes or comments on each of them.
  - Main Technologies: Node, Express, MongoDB, Mongoose, handlebars, Cheerio.
  - Github: https://github.com/squall2046/Web-Scraper

VGAMEDB
An app saved more than 16,000 video games information since 1984 in database.
- Users can search every game's Year of Release, Genre, Platform, Global Sales, Game Description.
- API load games Cover Image and show the images when available.
- VGAMEDB support to checking games by sorting and ordering.
- Users can also save their favorites games and leave comments.
  - Main Technologies: Node, Express, MySql, Sequelize ORM, handlebars, API.
  - Github: https://github.com/squall2046/VGAMEDB
